

### Triticale RVTs - Westlock 2023

Variety	Yield (% of Brevis)		Height		Lodging		LB/BU		TKW g/1000 seeds	
BREVIS	100%	a	94	a	1.0	a	58.3	a	36.0	a
AB STAMPEDER	90%	a	92	b	1.0	a	56.3	b	37.3	a
Average	5149	g/plot	92.8	cm	1.00	(1-9)	57.3	lbs/bu	36.7	g/1000 seeds
ANOVA p-value	0.0659	NS	0.0198		1.000	NS	<0.0001		0.0772	NS
CV%	3.32%		0.44%		0.00%		0.00%		1.26%	

***Single site years of data are often an unreliable indicator of variety performance.***

For publication in the Alberta Seed Guide, at least six site years over two growing seasons are required prior to reporting yield data.

Please reference the January 2024 - Alberta Seed Guide for multi-site year data.

Values followed by different letters (i.e., a,b,c) are statistically different.

Values followed by the same letter are NOT statistically different (i.e., a = ab, or abc = bc).

ANOVA p-value indicates statistical significance. If the p-value is less than 0.05, then there are significant differences in the described trait.

i.e., ANOVA p-value of <0.0001 for yield means that at least one variety has a statistically different yield.

i.e., ANOVA p-value of > 0.05 means there are no statistical differences in the trait between any of the varieties.
